17. Payment	10

1. New Patient – Initial Fees

Before a detailed consultation can take place, it is recommended that all new patients have baseline fertility investigations carried out before seeing a consultant. This enables your consultant to accurately discuss the most appropriate treatment option for you, giving you the best chance of having a baby. This also minimises any delays to starting treatment and reduces the overall cost to you.

Pre-Treatment Packages:

• **Heterosexual Couples Package** Includes: Pre-consultation investigations; Anti-Mullerian Hormone (AMH) blood test, detailed semen evaluation, trans vaginal pelvic scan with antral follicle count, BMI assessment & a consultation with one of our highly experienced fertility consultants.	**£515**
• **Same Sex (Female) Package** Includes: Pre-consultation investigations; Anti-Mullerian Hormone (AMH) blood test x 2, trans vaginal pelvic scan with antral follicle count x 2, BMI assessments x 2 & a consultation with one of our highly experienced fertility consultants. *Should only one lady be having treatment, please refer to the "Single Women Package" for pricing.*	**£600**
• **Single Women Package** Includes: Pre-consultation investigations; Anti-Mullerian Hormone (AMH) blood test, trans vaginal pelvic scan with antral follicle count, BMI assessment & a consultation with one of our highly experienced fertility consultants.	**£380**
• **Male Fertility Packages** Please refer to the detail in Section 13.	**Section 13**
• **Same Sex (Male) Package** As requirements can differ from couple to couple, please contact us for details and pricing.	**POA**

2. Consultation Fees

New Patient Private Consultation (included in pre-treatment packages)	**£270**
Follow up Consultation When arranging a pre-treatment package, a follow up consultation is not normally needed. However, depending on the results of investigations, some patients may require a further consultation.	**£180**

3. Individual Pre-Treatment Fees

Most patients will require the below investigations before treatment can commence, although not all patients will require all. Investigations marked * are included in the pre-treatment packages above. If other, non-routine, investigations are required, these will be discussed with you during your consultation.

Antral-Follicle Count (scan) / Pre-assessment Pelvic Scan*	**£195**
3D Scan with Antral-Follicle Count	**£260**
AMH blood investigation*	**£140**
Chlamydia Screening	**£60**
Chlamydia with Gonorrhoea Screening	**£75**
Full Semen Evaluation (For Treatment)* - includes assessment for treatment options	**£200**
Infection Screening Package - includes HIV, HEPB, HEPC screening tests	**£195**
Prolactin Investigation	**£60**
Thyroid (TSH) Blood Investigation	**£55**
Rubella	**£60**

4. IVF Treatment

All our treatment fees include the HFEA fee but exclude Embryo Glue (£250) and the use of Embryo Triple Select, our Timelapse Incubator, (£600), unless otherwise stated. If you wish to opt out of using Embryo Glue or Embryo Triple Select, please inform the admin team when calling to start your treatment and this will not be added to your invoice. If your consultant does not believe the use of Embryo Triple Select will be beneficial in your circumstances, this will be discussed at your review consultation and excluded from your treatment invoice.

IVF*# per cycle of IVF, including HFEA fee, treatment planning with one of our fertility nurses, mock embryo transfer (if required), monitoring scans, in-treatment blood tests, sperm preparation, egg collection (with conscious sedation or local anaesthetic), embryo creation, culture to blastocyst and fresh embryo transfer, pregnancy scan, post-treatment review consultation and up to 3 support counselling sessions.	**£4,700**
ICSI Supplement per cycle of IVF with Intracytoplasmic Sperm Injection - excluding potential costs associated with sperm retrieval eg PESA/TESA.	**£1,500**
Frozen Embryo Transfer* per FET cycle, including HFEA fee, treatment planning with one of our fertility nurses, monitoring scans, embryo thaw, embryo transfer, pregnancy scan, post treatment review and support counselling.	**£2,900**
Embryo Glue (Added to the cost of treatment and used as part of the embryo transfer process unless you choose to opt out)	**£250**

*Treatment fees are exclusive of the cost of drugs.

If a fresh treatment cycle results in a 'Freeze All' for medical reasons, there will be no charge for the subsequent Frozen Embryo Transfer, however embryo freeze and storage (for up to 2 years) fees of £1300 will become due. For Elective Freeze All cycles (non-medical) please see Embryo Preservation below.

5. Fertility Preservation

Egg Freezing & Storage* - per cycle of IVF including HFEA fee, monitoring scans, egg retrieval and preparation for freeze, egg freezing and storage for up to 2 years.	**£5,800**
Frozen Embryo Transfer after Egg Freeze – including HFEA fee monitoring scans, thaw, ICSI, embryo transfer, early pregnancy scan/follow up consultation.	**£4,400**
Embryo Preservation*# per cycle of IVF including HFEA fee, monitoring scans, egg retrieval, embryo creation, culture to blastocyst, embryo freeze and storage for up to 2 years.	**£5,800**
Frozen Embryo Transfer after Embryo Freeze – including HFEA fee, monitoring scans, embryo thaw, embryo transfer, early pregnancy scan/follow up consultation.	**£2,900**
Egg / Embryo Storage (per subsequent year)	**£415**

* Costs are exclusive of the cost of drugs and pre-treatment consultations/investigations.

If IVF with ICSI is required, there is an additional charge of £1500.

6. Treatment Involving Insemination

Intra-Uterine Insemination – IUI* additional fees are payable if donor sperm is required	**£1,350**
Donor Sperm per Ampoule – when selecting a donor from our clinic#	**£1,300**
Donor Sperm Supplement – includes matching consultation, coordination and CMV blood test (this fee is payable in advance and non-refundable if treatment does not go ahead).	**£375**

* Inclusive of HFEA fee, treatment planning, monitoring scans, sperm preparation, insemination, pregnancy scan, post treatment consultation and access to counselling support.

Donor sperm obtained from another clinic/supplier will incur additional charges to cover purchase costs, carriage and storage, some of these charges will be payable directly to the supplying clinic.

7. Treatment using Donor Embryos, Eggs & Sperm

All of our treatment fees include the HFEA fee but exclude Embryo Glue, unless otherwise stated. If you wish to opt out of using Embryo Glue, please inform the admin team when calling to start your treatment and this will not be added to your invoice.

Shared Parenthood/Partner donating eggs*# Treatment includes:

£8,500

- HFEA fee
- Treatment planning with a fertility nurse/donor expert
- Donor sperm selection
- Mock Embryo Transfer if required
- Monitoring scans for both ladies
- In treatment blood investigations for both ladies
- Sperm preparation
- Embryo creation and culture to blastocyst
- Fresh embryo transfer or elective freeze all*
- Pregnancy scan or post treatment review consultation
- Support counselling (up to 3 sessions)
- In treatment blood investigations
- One ampoule of donor sperm

* The above fees are exclusive of the cost of implications counselling, pre-treatment investigations, donor Infectious screening and drugs. If an elective freeze all is requested, the cost of the Frozen Embryo Transfer and ongoing storage is not included in these costs.

Donor sperm obtained from another clinic/supplier will incur additional charges, some which will be payable directly to the supplier, these charges are to cover purchase costs, carriage, and storage.

IVF with Known Donor Eggs* Treatment includes:

£8,500

- HFEA fee
- Treatment planning with a fertility nurse/donor expert
- Mock Embryo Transfer if required
- Monitoring scans for both recipient and known donor
- In treatment blood investigations for both recipient and donor
- Sperm preparation
- Embryo creation and culture to blastocyst
- Fresh embryo transfer or elective freeze all*
- Pregnancy scan or post treatment review consultation
- Support counselling (up to 3 sessions)
- In treatment blood investigations

* The above fees are exclusive of the cost of implications counselling, pre-treatment investigations, donor Infectious and genetic screening (required by law) and drugs. If an elective freeze all is requested, the cost of the Frozen Embryo Transfer and continued storage is not included in these costs. If donor sperm is required a supplement of £375 plus the cost of sperm at £1300 per ampoule will be payable.

Should a known donor request expenses an additional charge, of up to £985, will be payable by the recipient.

IVF with Fresh Donor Eggs* Treatment includes:

£13,900

Please be aware there may be a waiting list for this treatment option

- Suitable eggs (minimum 6 eggs)
- Donor screening/pre-treatment investigations
- Nurse consultation with a donor expert
- Monitoring scans
- 'In treatment' blood tests
- Sperm preparation

- Embryo preparation and culture to blastocyst
- Embryo transfer
- Pregnancy scan or post treatment review appointment
- Support counselling (up to 3 sessions)
- HFEA fee
- Donor's drugs

* The above fees are exclusive of the cost of implications counselling, pre-treatment investigations, donor Infectious and genetic screening (required by law) and drugs. If donor sperm is required a supplement of £375 plus the cost of sperm at £1300 per ampoule will be payable.

IVF with Frozen Donor Eggs – London Egg Bank Package* excluding cost of eggs and transportation which are payable directly to London Egg Bank (please enquire for full details).

£5,500 (plus cost of eggs

- Treatment planning including coordination with London Egg Bank
- Nurse consultation with a donor expert
- Monitoring scans
- 'In treatment' blood tests
- Sperm preparation
- Egg thaw
- ICSI
- Embryo preparation and culture to blastocyst
- Embryo Glue
- Embryo transfer
- Pregnancy scan or post treatment review consultation
- Support counselling (up to 3 sessions)
- HFEA Fee

* The above fees are exclusive of the cost of implications counselling, pre-treatment investigations, donor Infectious and genetic screening (required by law), embryo freeze and storage and drugs. If donor sperm is required a supplement of £375 plus the cost of sperm at £1,300 per ampoule will be payable.

Treatment with Donor Embryos (please enquire directly with the clinic for availability)

£5,150

Treatment includes:

- HFEA fee
- Nurse Consultation
- Embryo Thaw
- Monitoring scans
- Embryo Transfer
- Pregnancy scan or post treatment review consultation
- Support counselling (up to 3 sessions)

IVF with Donor Sperm*#** Treatment includes:

£6,375

- HFEA fee
- Donor matching and consultation with a donor expert*
- Mock Embryo Transfer if required
- CMV blood test*
- Monitoring scans
- 'In treatment' blood tests
- Sperm preparation
- Egg retrieval with conscious sedation or local anaesthetic
- Embryo preparation and culture to blastocyst
- Embryo transfer
- Pregnancy scan or post treatment review consultation
- Support counselling (up to 3 sessions)
- 1 ampoule of donor sperm from our clinic

IVF with Known Sperm Donor*#** (Excludes the cost of donor screening & transportation fees)

£5,075

Treatment includes:

- HFEA fee
- Coordination and consultation with a donor expert*
- Mock Embryo Transfer if required
- CMV blood test*
- Monitoring scans
- 'In treatment' blood tests
- Sperm preparation

- Egg retrieval with conscious sedation or local anaesthetic
- Embryo preparation and culture to blastocyst
- Embryo transfer
- Pregnancy scan or post treatment review consultation
- Support counselling (up to 3 sessions)

£375

* Donor Sperm Supplement – A non-refundable fee to cover your donor matching consultation, coordination and CMV blood test is payable in advance and non-refundable if treatment does not go ahead. If treatment does go ahead this fee will be deducted from your treatment invoice.

**The above fees are exclusive of the cost of implications counselling, pre-treatment investigations, drugs and any additional sperm ampoules which are charged at £1,300 per ampoule.

Donor sperm obtained from another clinic/supplier will incur additional charges, some of which will be payable directly to the supplier, these charges are to cover purchase costs, carriage and storage.

8. Sharing Arrangements

Sperm Sharing – significantly reduced cost treatment in which the male partner donates his sperm for the use of other fertility patients whilst having his own fertility treatment. A separate information and pricing leaflet is available for Sperm Sharing, please contact us for a copy **POA**

Egg Sharing - significantly reduced cost treatment in which the female partner donates her eggs for the use of other fertility patient whilst having her own fertility treatment. A separate information and pricing leaflet is available for Egg Sharing and Egg Sharing in a Shared Motherhood cycle, please contact us for a copy

9. Surrogacy

As all surrogacy arrangements are specific to the surrogate and intended parents, please contact the clinic to arrange a consultation with our specialist consultant.

10. Surgical Sperm Retrieval

Percutaneous Epididymal Sperm Aspiration* (PESA) (including sedation) **£2,575**
Testicular Sperm Extraction* (TESA) (including sedation) **£3,295**
Surgical Sperm Retrieval (TESE)*# (including General Anaesthetic) **POA**

* Costs include freezing and storage of sperm for 1 year.

Some investigations, procedures and consultations with a urologist are not arranged by Hull & East Riding Fertility and excluded from our charging structure.

11. Average Drug Costs

The cost of drugs can vary significantly from patient to patient. The costs outlined below are therefore based on an average cost per patient. When you commence your treatment at Hull & East Riding Fertility, we will be able to give you a more tailored estimate of these costs.

- **IVF / IVF with ICSI** **£1,500**
- **Frozen Embryo Treatment cycle (FET)** **£700**
- **Intra-uterine insemination (IUI)** **£700**

12. Embryo & Sperm Storage Fees

- **Embryo freezing inc 2 years' storage.** **£1,300**
- **Embryo storage – subsequent year** **£415**
- **Semen evaluation, freeze and storage for up to 1 year.** **£680**
- **Semen storage – subsequent year** **£415**

13. Fertility Assessments

All of our assessments include a full consultation and treatment plan (if appropriate)

Female assessment – including AMH, trans vaginal ultrasound scan (with antral follicle count), BMI assessment and results consultation. **£380**

Heterosexual couple's assessment – including AMH, BMI assessment, trans vaginal ultrasound scan with antral follicle count, semen analysis with anti-sperm antibody testing and results consultation. **£515**

Same sex (female) couple's assessment AMH, BMI assessment, trans vaginal ultrasound scan with antral follicle count for both partners and results consultation. *Should only one lady be having treatment, please refer to Female Assessment for pricing.* **£600**

Male Fertility:

- **Full Semen Evaluation** – includes initial Semen Analysis & emailed copy of results (this package does not include a discussion about the results, if you wish to discuss results and options, please book one of the below packages) **£250**
- **Foundation Screen** – includes an initial Semen Analysis & Specialist Consultation **£350**
- **Focussed Hormone Check** – Foundation Screen plus Hormone Profile **£530**
- **Genetic Insight** – Foundation Screen, Hormone Profile plus Genetic Testing (Karyotype & Y Deletion) **£995**
- **DNA Integrity Plus** – Foundation Screen plus Sperm DNA Fragmentation Test (EXACT – see section 14) **£920**
- **Comprehensive Male Fertility Panel** – Foundation Screen, Hormone Profile, Genetic Testing & Fragmentation (EXACT – see section 14). **£1,650**
- **Follow up & Re-check** – Repeat Semen Analysis & Review Consultation **£265**

Please be aware that further investigations may be required, depending on individual circumstances, before a treatment cycle can be planned.

14. Treatment Supplements

The supplements below incur additional fees to that of a standard treatment cycle. These supplements are not suitable for all patients. Should you or your consultant feel there is a benefit to any of the below being added to your treatment cycle, this should be discussed during your consultation.

Artificial Oocyte Activation (AOA) …….. **£200**

AOA is a technique used to improve fertilization rates in couples who have experienced failed or low fertilisation in previous ICSI cycles. AOA involves using a substance like calcium ionophore to artificially trigger the egg's activation, increasing calcium within the egg and potentially enhancing fertilisation.

Embryo Glue ……..

EmbryoGlue is not an actual glue, but it acts like glue by increasing the chance of implantation of the embryo to the womb. It consists of a high concentration of hyaluronan and recombinant human albumin, both of which promote implantation **£250**

EmbryoScope Triple Select ……..……..…….

A 3-dimensional time-lapse imaging system enabling enhanced information about embryo development to be collected for refinement of embryo selection. A powerful embryo grading system that harnesses clinical expertise and artificial intelligence (AI) to select the best embryo for transfer and to optimise your chances of success. **£600**

Endometrial Receptivity Testing:

Endometrial receptivity testing involves taking a biopsy of the endometrial lining of the uterus and testing the tissue to see which genes are expressed. When combined with a computational predictor these results indicate when the endometrium may be most receptive to an embryo implanting. The below fees include a follow up consultation to discuss results.

ERA …… **£1,400**

ALICE …… **£1,100**

EMMA ……... **£1,250**

EMMA & ALICE combined ……..…… **£1,600**

TRIPLE (ERA, EMMA & ALICE) …… **£2,200**

Endometrial biopsy…..……..

An endometrial biopsy is a medical procedure to remove and check a tiny piece of tissue from the lining of the uterus. Your consultant may use this to find causes of heavy, unusual or irregular bleeding, check for abnormal cell changes or look for signs of uterine inflammation or infection. **£430**

Endometrial scratch…..……..

An endometrial scratch is a procedure where a small, sterile plastic tube is used to gently scratch the lining of the uterus (endometrium). It is performed before IVF treatment and may increase the chances of implantation by triggering the body's healing response, which may make the endometrium more receptive to an embryo. **£320**

Physiological intracytoplasmic sperm injection (PICSI) ……...

PICSI technique used to select sperm to use in ICSI treatment. It involves placing sperm with hyaluronic acid (HA), a natural compound found in the body. PICSI identifies sperm that can bind to HA and these sperm are selected for use in treatment. (*Fee is additional to the ICSI supplement)* **£365**

SIS procedure ……

Saline infusion sonohysterogram (SIS) is a procedure to evaluate the lining of the uterus and shape of the uterine cavity. A regular transvaginal ultrasound can pick up many uterine abnormalities, however, more subtle defects which may impact reproduction may be better evaluated with SIS. **£460**

Sperm DNA fragmentation testing (include a follow up consultation but do not include a standard semen evaluation which is charged separately)

A sperm DNA fragmentation test assesses the condition of sperm DNA, specifically looking for damage or fragmentation that can affect male fertility. It can be used to evaluate sperm health beyond what a standard semen analysis provides. Your consultant will help to identify the most appropriate test.

EXACT test ……..… **£780**

EXTEND test …… **£920**

EXTENSIV (Exact & Extend Combined)…….…… **£1,600**

Zymot Test **£260**

A Zymot test is a sperm selection process. This test selects sperm with better morphology (shape) and motility and helps to isolate sperm with lower levels of DNA fragmentation, reducing the risk of using low-quality sperm in fertility treatment.

15. Additional Services / Fees

Cancellation fee (cancelled prior treatment commencement) Once a treatment cycle has commenced, cancellation, refund and restart fees are calculated to the point of cancellation date). **£300**

Conscious sedation at ET .....

Counselling – additional support counselling session (up to 3 support sessions included in the cost of treatment cycles) **£380**

Counselling - assessment report (when required)..... *up to* **£100**

Counselling - implications counselling session ..... *up to* **£140**

Counselling – 15 minutes repeat session ..... *up to* **£120**

Donor sperm cycle – donor matching consultation including CMV blood test (deducted from cost of treatment if treatment goes ahead)

..... **£60**

Donor sperm per ampoule (when using sperm from our clinic) **£375**

HFEA Fee (Fresh & Frozen Cycles) **£1,300**

HFEA Fee (IUI) **£115**

HyCoSy **£45**

Interpretation services (per hour) **£600**

Mock ET (standalone cost – if an IVF treatment follows, this will be deducted from your treatment fee) **£95**

Ovulation induction package (including up to 4 scans. Excludes drugs and consultations) **£200**

Private prescriptions **£750**

Ultrasound Scan - 2D Reassurance scan (up to 12 weeks) **£60**

Ultrasound Scan – 2D **£195**

Ultrasound Scan – 3D **£195**

£260

15. Additional Blood Investigations

Not all patients will require all the blood investigations below, additionally for some patients, additional blood investigations may be required that are not on the below list. Any additional investigations that your consultant feels necessary, will be discussed and agreed during your consultation.

AMH **£140**

Anti-cardiolipin **£75**

B2 Glycoprotein antibodies **£155**

Chlamydia screening **£60**

Chlamydia with Gonorrhoea screening **£75**

CMV	**£75**
CMV PCR	**£100**
Cystic fibrosis & karyotype screening	**£550**
Full blood count	**£65**
Infection screening package (to include HIV, HEPB, HEPC screening tests)	**£195**
Progesterone (day 21) blood test	**£65**
Prolactin investigation	**£60**
Rubella	**£60**
Thyroid (TSH) blood investigation	**£55**
Zika Abs IgM & igG	**£130**

16. Payment & Refunds

Payment and Refund Policy

Invoices for your treatment will be issued in line with your Cost of Treatment Plan. Payment must be received in full before your treatment cycle begins.

Charges for pre-treatment investigations and any other appointments or services must be paid at least 48 hours before your appointment.

We accept payment by credit or debit card or bank transfer.

If you cancel an appointment with less than 48 hours' notice, the full appointment fee will be charged, and no refund will be payable.

Fertility Medication

For your convenience, we work with Fertility2U, a specialist homecare pharmacy that dispenses and delivers most fertility medications directly to patients. Payment for these medications should be made directly to Fertility2U.

Any medication supplied directly by the clinic (for example, top-up medication) must be paid for before it is dispensed.

Please note that, in line with UK legislation, medications that have been dispensed to a patient cannot be returned or refunded.

Treatment Cycle Cancellations

If your treatment cycle has started and is subsequently cancelled, abandoned, or needs to be restarted, any applicable refund or restart fee will be calculated based on the stage of treatment reached at the time of cancellation, abandonment, or restart.

Embryo and Gamete Storage Refunds

If you have extended your original embryo or gamete storage period and you no longer require storage, we will refund the unused portion of your prepaid storage fees from the date your embryos or gametes are used or disposed of. A £50 administration fee will be deducted from the refund.

Please note that the original freezing fees are non-refundable.

Triple Select® Embryoscope Incubator

If you cancel your use of the Triple Select® Embryoscope incubator more than 48 hours before your egg collection, you will receive a full refund.

If you cancel less than 48 hours before your egg collection, your refund will be reduced by £150. No refund will be issued following egg collection.
